

Windlight Olympia

Elegant and sublime, the Windlight Olympia is the ideal accessory for stylishly furnished indoor and outdoor areas. The mixture of high-quality glass and stainless-steel frame is a timeless classic.

The mouth-blown glass with its many air bubbles immerses the beauty of candlelight in a fascinating light. Each glass cylinder is unique. Sometimes it has a lot of air bubbles, sometimes small bubbles and sometimes big bubbles - a sign of handmade craftsmanship!

The metal stand is made in Switzerland in a small factory. Due to the special primer and the powder coating, the frame is absolutely rust-free and can therefore also be used in the garden or on the terrace without hesitation. The lantern is available in three sizes. Ideal for pillar candles but also for orchids and flower arrangements. The candle is not included.
