

Floating swan

The swan swims and has white feathers. Almost like the real thing - only just made of glass. How the feathers resist the great heat during the forming of the glass remains a mystery.

Production method:

Glass tubes and glass rods blown and shaped at the burner- so-called "lamp technique".

Care recommendations (print version)

| Nr. | Bezeichnung | Masse | Preis |
|-------|---------------|--------------|-----------|
| 703.2 | Floating swan | Ø 50 x 80 mm | 24.00 CHF |
