

Glass ingot "999.9 fine GOLD"

At 1500 ° Celsius, sand, lime, soda and around 15 others minerals are melted together to create our very own Hergiswiler glass. Just like liquid gold, we pour the liquid glass in a gold ingot shape!

The ingot serves as a door stopper, letter holder or simply as a noble object.

Manufacturing technique:

The liquid glass poured by hand in the cast form.

Care recommendations (print version)

Nr.	Bezeichnung	Masse	Preis
80303	Glass ingot "999.9 fine GOLD"	160 x 75 x 45 mm	79.00 CHF
