

Wasp-glas

Wasps can be a real nuisance in summer. They rush to be present for a cozy brunch and hum around you and your delicious food. As useful as they are for the balance of nature, they are especially dangerous for individuals with allergies and children. You can fight the wasps before they beat you to the punch.

A solution to this is our wasp trap. Put the wasp trap in your garden. To attract the wasps, just add water, vinegar, and sugar. It also works with sweet cider or beer. A safer and non-toxic way to minimize unwanted flying insects.
