

Tree candle holder Set of 3

If you want to add candles to your Christmas tree in a traditional way, then these handmade glass Tree candle holders are a must! Just hang it on the branches, light the candles and the Christmas tree will shine with a beautiful candlelight!

The Tree candle holders are very sensitive and must be treated accordingly. The glass used is highly heat-resistant. The best way to remove wax residue is to hold the holder under hot water and wait until the wax has melted off by itself. If there are still soot residues, hold the tree candle holder by the cup and rub it out with soapy steel cotton or another suitable cleaning rag. Under no circumstances should there be any pressure between the lower holder the upper candle glass... otherwise it will "click"!and

Matching candles Art. 813.1
