

## Hanging light snow

A design as clear as ice in the winter landscape, which meets warm light and thus forms an attractive symbiosis. Whether as a Christmas tree decoration or as a window decoration, the mouth-blown ball made of heat-resistant borosilicate glass is always a real eye-catcher. 100% handmade, each hanging light is unique.

Tip: Hang the light on a velvet ribbon, a pretty cord or a chiffon ribbon in front of a window and you will enjoy the unique play of light every evening.
