

Etagère with a dome

As if cakes and cupcakes weren't a feast for the eyes, they look even more beautiful when they are presented on foot under the hand-blown glass dome of the étagère! Cheese, fruit and biscuits can also be served in a stylish and festive way.

Tip: The bell jar can also be used as a mini greenhouse! Simply place various succulents and cacti in small pots on the plate and put the cloche on top. For the Christmas season you can, for example, fill the cloche with fairy lights, stars and Christmas tree balls. Let your creativity run free and decorate your bell jar according to your personal taste.
